39 – FYI - SHOWER HEAD WITH PAUSE SWITCH. We have a problem it's the same as most RV users, getting the shower spray to work as we desire it to is a ongoing problem. Recently we went on a mission to find a more user friendly shower spray head which could be "PAUSED" as in turn the water off while applying soap to the body. We finally found what we were looking for at Walmart of all places below is a link to the shower head at Walmart. <http://www.walmart.com/ip/Eco-Spa-35-Setting-Multi-Shower-Head/16821303#Item+Description>

We did not use both shower heads that are enclosed in the package. We had been unable to find a single shower head with a PAUSE switch in the handle that we liked except for this model.

The above shower head passed the Cathey shower/soap test, now we are both happy. Wet Down, Turn Pause On, Soap Up, Turn Pause Off, Rinse Off, this Brushed Nickel Eco Spa Shower Head works for us.
