

2010 43QGP Allegro Bus

4/25/2011

NINETEENTH - coach modification, **BED LIFT HANDLE**. As we modified the 2007 Phaeton's bed lift with a handle we also added the bed lift handle to our Allegro Bus, this modification makes lifting and lowering the bed easier and also a one hand operation. Our coach has the KING select comfort mattress, the QUEEN size mattress may use different measurements.

The components, one piece of 3/4 inch plywood, cut 7 inches by 11 inches with all corners rounded. Three - two inch by 3/8 inch carriage bolts with lock washers and nuts. I also used three 1/2 inch flat washers under each carriage bolts head to keep the carriage bolt head from cutting into the bed frame's wood too much when the nuts were tightened. I cut an oval shaped 1 1/2 inch by 6 inch hand slot leaving 1 inch for the handle. On our bus the handle can be installed with 3 inches of the bed lift handle extended past the end of the OEM bed frame and not cause a conflict when the two bedroom slides are closed.
