

## 2010 43QGP Allegro Bus

8/24/2011

**THIRTY-FIFTH - coach modification, PANTRY DOOR ROLLER CATCH'S ADDED.** Tiffin installed "Roller Catches" on the top edge of the four pantry doors in our coach, two doors above the TV and two doors under the TV. On our previous coach a 2007 Phaeton, Tiffin installed the same door roller catches. We had a door pop partially open while traveling in the Phaeton when we started to move the slide out we almost tore a door off the hinges before we heard the crunch and stopped moving the slide. We were fortunate the only damage was a bent door hinge which I was able to straighten. After that near disaster we purchased and installed additional roller catches on the lower portion of each door. Tiffin installed one on the top portion of those doors. In almost four years after the additional catches were installed our Phaeton never again suffered the near disaster of tearing a pantry door off/loose. We checked each time before moving the slide, but never had a door try to open after installing a second catch on each door. Today I installed additional "Roller Catches" on the lower portion of our coach's four pantry doors. The cost was about \$ 10.00, but piece of mind is priceless.

Upper Pantry Cabinet, over the TV with four roller catches.
